Allowable Subject Matter

3. **Claims 7-14** are allowed.
4. **Claims 7-14** are renumbered.
5. The following is an examiner's statement of reasons for allowance:

Claim 7 is allowed because none of the prior art of record anticipates or renders obvious a method for operating a technical installation comprising a plurality of components, the method including the steps placing one or more of the components into operation to perform a function relating to operation of the installation or taking said one or more of the components out of operation; when a first of the components is placed into operation or taken out of operation, initiating an evaluation of multiple components other than said one or more of the components with assignment of a numerical value to each; totaling the numerical values assigned to each of the multiple components other than said one or more of the components; using the totaled numerical values for each of the multiple components other than said one or more of the

components to determine those of the multiple components other than said one or more of the components which will next be placed into operation or taken out of operation; assigning at least one of the multiple components other than said one or more of the components at least one initialization value and adding the initialization value to the totaled numerical values of the at least one of the multiple components other than said one or more of the components; and placing one of the multiple components other than said one or more of the components into operation to perform a function relating to operation of the installation or one of the multiple components other than said one or more of the components out of operation based on summation of numerical values.

Claim 12 is allowed because none of the prior art of record anticipates or renders obvious a control system configured for operating a combustion system for generating electricity, comprising a plurality of components such that during operation of the technical installation, when each component is placed into operation or taken out of operation the control system initiates an evaluation of at least one other of the components by a numerical value, the control system totals the numerical values of each said at least one other of the components, and the control system uses the totaled numerical values to determine among said at least one other of the components, those components which are to be activated or deactivated next, wherein the control system assigns to one of said at least one other of the components at least one initialization value and the initialization value is added to the totaled numerical values of the one of said at least one other of the components.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
